<sup>▲</sup> The dc component must not exceed 100 volts.<sup>□</sup> As described in "Standards of Good Engineering Practice Concerning Television Broadcast Stations", Federal Communications Commission.<sup>■</sup> This rating is applicable where the duration of the voltage pulse does not exceed 15 per cent of one vertical scanning cycle. In a 525-line, 30-frame system, 15 per cent of one vertical scanning cycle is 2.5 milliseconds.<sup>●</sup> Under no circumstances should this absolute value be exceeded.
