

The Siemens Traveling-Wave Tubes RW 6 and RW 80

Modern output tubes
for microwave link systems
in the frequency range 5.8 to 8.5 Gc.

No responsibility is accepted
for freedom from patents on any of the
circuits in this TECHNICAL REPORT.

1.	Introduction	1
2.	Principles of Operation of the Traveling-Wave Tube	1
3.	Construction of the RW 6 and RW 80	3
4.	Beam Focusing and the Magnet System	4
5.	The Medium-Power Traveling-Wave Tube RW 6	6
5.1.	Technical data	6
5.2.	Gain and output power	8
5.3.	Distortion	12
5.4.	Noise	15
5.5.	Matching	17
5.6.	Decoupling attenuation	17
5.7.	Temperature performance	17
5.8.	Stability	18
6.	The Medium-Power Traveling-Wave Tube RW 80	19
6.1.	Technical data	19
6.2.	Gain and output power	21
6.3.	AM-PM conversion	21
7.	Operating Instructions	25
7.1.	Power supplies	25
7.2.	Setting-up procedure	26
7.3.	Installation	27
7.4.	Cooling	27
7.5.	Associated circuit elements for the RW 6 and RW 80	23
8.	Ordering Numbers	28
9.	Example for ordering	29
10.	References	29
